Dear Patient,

We want to make you aware of a condition that may affect you. As many as 12 million Americans have **Peripheral Arterial Disease (PAD)**. It is a condition in which the arteries that carry blood to the muscles of the legs become narrowed or blocked due to the build up of plaque. Blood flow becomes sluggish and **poor circulation** in the legs, feet and toes may result. This may then lead to cramping, discomfort or possibly a mild “fatigue” in the legs which can limit walking distance, speed and overall ability. This is the same disease process that causes blockages in the heart.

Unfortunately, many people with PAD go dangerously unrecognized and may have a higher risk for a heart attack, stroke, or even amputation. The symptoms of PAD may be subtle and are often mistaken for arthritis, being “out of shape,” or as part of the normal aging process. Many times it can be simply diagnosed by performing a calculation after taking a blood pressure in your arms and at your ankles.

Please take a moment to answer the questions below so that we may briefly screen you for PAD. If you have any questions or concerns regarding PAD and your risk, or would just like more information please do not hesitate to ask.

- 1) Do you experience discomfort or aching in the muscles of your legs when you walk that is relieved by rest? YES NO
- 2) Do your legs ever feel fatigued or heavy when walking or are active? YES NO
- 3) Do you ever need to stop and rest when walking or have difficulty keeping up with others? YES NO
- 4) Do your feet or toes bother you on most nights while lying in bed with relief when they are dangled at the edge of the bed? YES NO
- 5) Any prior ulcers on your feet or lower legs? YES NO

6) Would you have difficulty or require assistance doing any of the following?

	<u>No Difficulty</u>	<u>Some Difficulty</u>	<u>Unable</u>
Walking one block?	1	2	3
Climbing one flight of stairs?	1	2	3
Walking at an increased speed?	1	2	3

7) Please check if you have a history of the following.

Diabetes or “borderline” diabetes       Age  $\geq$  70 years

Smoking or history of smoking or tobacco use
